Lynn River Works, Sept. 12, 1955

Mr. A. F. Vinson
Vice President - Manufacturing
Manufacturing Services
New York

Dear Art:

We had our Commencement Exercises last Friday for the Value Analysis Seminar just completed for the Medium Steam Turbine Department. I sat through the whole exercise, listening to the summary of the projects as given by the 32 teams participating from this department and frankly I rarely witnessed as much enthusiasm on the part of hard-bitten engineers and factory men on something, while not new to them, yet was presented to them in such a light that it almost looked like a brand new story.

I don't know how close you are to the work that Mr. Miles is doing as I had not been too close to it for four or five years. I did have an excellent chance during this Seminar to observe what he was doing and I would like you to know that through his medium, and that of his very capable men, you have in operation one of the best tools ever devised by the Company for assistance to operations.
