Dear Larry:

I want to thank you for your note of April 10th.

It looks like you have a very interesting schedule ahead of you starting in the next ten days.

I also noted on your stationery that you have the title of "Miles Associates." Are you actually engaged in an outside enterprise or is this just a step in preparing for some future plan?

Very truly yours,

Bill

Dear Bill,

I am taking this opportunity to pay for my subscription to your newsletter. It is very interesting to receive it and thank you so much for the kind remarks in my behalf.

Dorothy, you might run off a copy of this schedule and return it to me.

Bill, I would say one of the most significant changes in my feelings since my new "status in life" is that now I have time to read and to think. I pick up the same magazines but instead of a frantic, stressed feeling, that I must rush through them, I have a comfortable, satisfied feeling that I can learn from them.

I don't especially know the reason for this unless it is a self-imposed guilty conscience most of us had in business, arising from a belief that we should read more than we ever got read.

Warm regards,

Larry

Dear Bill,

Thanks a million for the GE calendar.

I can't remember the Pensioners Newsletter but now I'm looking forward much to seeing it. I'll enclose a few notes.

Warmest regards to all of you--

Larry

Some Notes on Pensioner, Larry Miles

Jan. 6, 1965

Probably what we all expect to treasure most as that first day of retirement comes, is the ability to get half awake -- look at the clock -- smile -- roll back over and sleep until nature's forces awaken us. This is real. It's been a source of pleasure every morning.

Something I'd hoped for was a chance to have a real vacation on my cruiser, The Duke, not just a "quickie, rush trip," as I've always taken. That was great. I had a slip at Pier 3, World's Fair Marina, all season. Five minutes walk to Met Stadium, six minutes to subway, seven minutes to The Fair.

The cruiser sleeps eight -- so dozens of our fine friends visited us. Typically, if they were from away, then enjoyed one day in NYC, one at the Fair, and one cruising. We often cruised by the Statue of Liberty and often around Manhattan Island. It is about 5 to 1 that we'll do it again this year.

Our youngest, Bob, is a high school senior, active in Student Council and much other good work.

Helen and I will probably head for a warmer climate. The ice and snow have become a nuisance. We may spend a midsummer month in Florida in order to experience Florida at its "worst" -- only trouble is it interferes with the boating season.

Professionally I receive a fair number of requests for talks and for consulting work. I've established the procedure that I'll either do it "for free" if it is real significant and could benefit General Electric or The USA, or I'll do it for pretty good pay -- if it's normal industrial work. Do some of each -- it works about right.

Helen and I head for southern California in a few days where we'll see the son's family and teach in UCLA a couple of weeks.

The pension check is always on the barrell head and I congratulate you all when I see the GE stock price.

Larry

Dear Larry:

This is just a short note to tell you that I am planning to issue a Pensioners' Newsletter during January and no newsletter would be complete without a little note about your current activities and plans. So please send me a little letter about yourself, family, grandchildren, etc. and what has been happening during the past year plus your immediate plans.

As you will remember, this newsletter is really planned for the pensioners with whom we were associated in purchasing, traffic, value and production control work so please join the group.

I want to wish Helen and you a most happy, healthy and successful new year in 1965.

Best regards,

Bill
