## "VE" in the field of "Soft Ware".

Re. Establishment of Purchasing Control System  
on the basis of the application of "VE" concept.

Nissan Diesel Motor Co. LTD.

Makoto Kofukada.

Naotoshi Nishioka.

1. The concept of "VE" is essentially quite same in the field of "Soft Ware" as well as in the field of "Hard Ware".
2. "VE" is mainly composed of concept itself. And IE, QC and other control techniques of category concerned will be also applied to "Soft Ware".
3. There are two important factors in "Soft Ware", that is, the establishment of System and application of system, both of which must be considered parallelly to promote the job.
4. Furthermore, it is necessary to make the re-analysis of the items required of organization in the part system for purchasing and subjects required of the highest system must be fully studied.
5. We discuss mainly herewith, about the category of establishing system and especially "the generation of the establishment of system".
6. The ~~central~~ <sup>central</sup> theme in generation of the establishment of the system is to integrate "the similar or familiar system".
7. On the basis of the above mentioned, we have unified the system of "purchasing of parts", "purchasing of materials" and "purchasing of tools".
